

# The 1500 Project

## Google Earth™ 3D Model

### ABOUT THE 3D MODEL

1. Google Earth™ is a free software package that, among other things, allows the design community to share 3D renderings of their work with potentially millions of other people across the globe. This rendering is one such effort.
2. This 3D model has been updated several times since its initial development in 2008/09, concurrent with progress in the design process. While it substantially represents the final design of the building, 1500 may in fact differ as-built.
3. We extend thanks to [Melham Associates, PC](#), of Harrisburg, for their valued partnership in the execution of this rendering.

### INSTRUCTIONS ON DOWNLOAD

1. If you do not have Google Earth™ installed on your computer, visit <http://earth.google.com> to learn about and download this free software program. This program needs to be installed in order to access the 3D model.
2. Download the 3D model from our website at <http://www.1500project.com/sites/default/files/1500KMZv3.kmz>.
3. 1500 should automatically appear in Google Earth™ once the file is downloaded (make sure you have the 3D buildings tab selected in Google Earth in order to view).
4. Have fun!
